

Mission

As a partnership between airport, operators, and local community, provide advice and assistance to WIAL in its preparation and implementation of a noise management plan for Wellington Airport.

Principal roles

- Monitor the aviation industry's compliance with the rules as finally confirmed through the review of WCC district plan, and other regulatory instruments.
- Monitor the regulatory agencies' enforcement regime.
- Provide an open and consultative forum for
 - exchange of information between parties
 - discussion and recommendations on requests for exemptions/waivers.
- WIAL will consult the committee on
 - acceptable protocols for measuring and reporting noise impact
 - mechanisms for reducing noise impact
 - specifications, selection and location of noise monitoring equipment
 - best practice from overseas jurisdictions

In support of these roles

- **WIAL** will provide
 - secretarial and support services
 - updated activity reports on aircraft movements, curfew, etc
 - updated reports on system quality assurance checks
 - technical reports on system development
 - list of complaints and correspondence
- **WCC/WIAL** will provide
 - updated noise exposure reports from the noise monitoring system in a manner which is readily understood by outside observers
- **Aircraft** operators will provide
 - updated activity reports on engine testing (yet to be provided).

- **Residents** will provide
 - list of related complaints and correspondence, which arise through their networks.
- **Airways Corporation of New Zealand** will provide
 - information and advice on the Air Traffic Services, and aircraft operations.
- **All parties** will provide
 - information gathered through networks on relevant best practice in overseas airports.
- A **technical working group** will be established which will report through to the committee.
